

СВЕДЕНИЯ О ВЕДУЩЕЙ ОРГАНИЗАЦИИ

при защите диссертации Краевой Ольги Александровны

Название	ИНЭОС РАН
Почтовый индекс, адрес, web-сайт, электронный адрес организации	119991, ГСП-1, Москва, 119334, ул. Вавилова, 28 https://ineos.ac.ru/ , larina@ineos.ac.ru
Полное наименование организации в соответствии с уставом	Федеральное государственное бюджетное учреждение науки Институт элементоорганических соединений им. А.Н. Несмеянова Российской академии наук (ИНЭОС РАН)

Публикации по теме диссертации соискателя за последние 5 лет:

1. Abramova, N. V. Metallocenyl-containing and Unsaturated Fulleropyrrolidine Derivatives: Synthesis and Hydrogenation / N. V. Abramova, V. A. Shmakova, A. P. Pleshkova, V. I. Sokolov // Russ. J. Coord. Chem. – 2019. – V.45. – P. 124–127.
2. Romanova, V. S. Synthesis of biologically relevant complexes based on fullerene and vitamin B12 derivative / V. S. Romanova, N. Yu. Shepeta, Z. S. Klemenkova, K. K. Babievskii, D. V. Beigulenko, I. A. Yamskov, K. A. Kochetkov // INEOS Open. – 2019. – V. 2. – №. 2. – P. 41-44.
3. Tumanskii, B. L. Manganese(III) acetate-mediated activation of C-H bonds of weak CH-acids; addition of o-carborane, its derivatives, and some other CH-acids to [60]-fullerene / B. L. Tumanskii, D. S. Sabirov, S. P. Solodovnikov, Yu. I. Lyakhovetsky // Dalton Trans. – 2019. – V. 48. – №. 6. – P. 2046-2058.
4. Levitskiy, O. A. Individual ((f,t) A)- and ((f,t) C)-Fullerene-Based Nickel(II) Glycinates: Protected Chiral Amino Acids Directly Linked to a Chiral π -Electron System / O. A. Levitskiy, Yu. K. Grishin, O. O. Semivrazhskaya, T. V. Magdesieva, A. A. Ambartsumyan, K. A. Kochetkov // Angew. Chem. Int. Ed. – 2017. – V. 56. – №. 10. – P. 2704-2708.
5. Chamkin, A. A. Reactions of Ferrocenium Hexafluorophosphate with P-OR Nucleophiles Give Ring C-H Functionalization or Ring Replacement Products Depending on the Phosphorus Reagent / A. A. Chamkin, V. V. Krivykh, A. Z. Kreindlin, F. M. Dolgushin, N. A. Ustynyuk // Eur. J. Inorg. Chem. – 2021. – V. 2021. – №. 16. – P. 1601-1610.
6. Brel, V. K. Synthesis and biological evaluation of indolylglyoxylamide bisphosphonates, antimitotic microtubule-targeting derivatives of indibulin with improved aqueous solubility / V. K. Brel, O. I. Artyushin, R. N. Chuprov-Netochin, S. V. Leonov, M. N. Semenova, V. V. Semenov // Bioorg. Med. Chem. Lett. – 2020. – V. 30. – №. 23. – P. 127635.
7. Kosenko, I. Synthesis of coumarins modified with cobalt bis (1,2-dicarbollide) and closedodecaborate boron clusters / I. Kosenko, J. Laskova, A. Kozlova, A. Semioshkin, V. I. Bregadze // J. Organomet. Chem. – 2020. – V. 921. – P. 121370.
8. Shmalko, A. V. Synthesis and structure of 3-aryloxy derivatives of ortho-carborane / A. V. Shmalko, S. A. Anufriev, M. Yu. Stogniy, K. Yu. Suponitsky, I. B. Sivaev // New J. Chem. – 2020. – V. 44. – №. 25. – P. 10199-10202.
9. Druzina, A. A. Novel Cobalt Bis(dicarbollide) Based on Terminal Alkynes and Their Click-Reactions / A. A. Druzina, I. D. Kosenko, O. B. Zhidkova, I. V. Ananyev, S. V. Timofeev, V. I. Bregadze // Eur. J. Inorg. Chem. – 2020. – V. 2020. – №. 27. – P. 2658-2665.
10. Akhrem, I. S. Simple and Efficient "One-Pot" Synthesis of Diphenylaryl (Heteroaryl) Methanols from Benzene / I. S. Akhrem, D. V. Avetisyan, L. V. Afanas'eva, O. I. Artyushin // ChemistrySelect. – 2020. – V. 5. – №. 26. – P. 7835-7839.
